COOPERATIVE HIGHER EDUCATION: THE KEY TO SUCCESS

Experience the Advantage – the Synergy of Theory and Practice
"Our students are highly sought after in the areas of climate protection and mobility and energy transition, be it in business, engineering, social work or the health sector. Studying at DHBW for three years will not only equip you with the necessary academic skills, but also a high amount of practical experience. Take on responsibility and help shape the world of tomorrow!"

Prof. Dr. Martina Klärle, President of DHBW
BADEN-WUERTTEMBERG
COOPERATIVE STATE UNIVERSITY (DHBW)

Baden-Wuerttemberg Cooperative State University is the first higher education institution in Germany to integrate academic studies with workplace training. Founded on March 1, 2009, DHBW traces its roots back to the Berufsakademie Baden-Wuerttemberg. Today the university continues to carry on the highly successful tradition of cooperative education.

With over 34,000 students, about 9,000 corporate partner companies and social institutions and over 210,000 alumni, DHBW is the largest higher education institution in the German Federal State of Baden-Wuerttemberg.

Throughout its 12 locations and campuses, DHBW offers a wide range of nationally and internationally accredited undergraduate study programmes in the field of business, engineering and social work. In addition, there is a great variety of postgraduate degree courses with an integrated on-the-job training as well as special programmes for non-degree seeking students.

Further information on Baden-Württemberg Cooperative State University

THE INNOVATIVE DUAL STUDY CONCEPT

The core principle of the dual education at DHBW is the three-month rhythm, by which students switch between university and their workplace training provider aiming to offer both academic skills and work-related expertise.

UNIQUE FEATURES OF WORK-INTEGRATED LEARNING

- DHBW closely cooperates with about 9,000 companies and social institutions all over Germany – its so-called corporate partners (Duale Partner in German).

- Corporate partners select their students and provide them with a work placement. In order to get admitted to DHBW, prospective students apply directly to the chosen partner company or institution.

- In the course of their studies, the students regularly switch between the university and the company / institution which offers the training. During all studies the students receive a monthly remuneration.

- Due to their profound knowledge and valuable work experience, DHBW graduates enjoy excellent prospects on the labour market and are highly employable. About 85 % are taken over into attractive positions by the corporate partners.

Cooperative Education at DHBW

- www.dhbw.de/cooperative-education
FINANCIAL INDEPENDENCE
DHBW students are financially independent from the first semester onwards. As employees of a company or institution the students are regularly paid throughout the whole study period. The monthly remuneration is determined by the corporate partner providing the training.

MULTIFACETED AND INTENSIVE STUDIES
All undergraduate study programmes offered at DHBW take three years (6 semesters). The phases of academic studies and workplace training alternate in regular three-month intervals, ensuring both pace and variety throughout the programme.

LECTURERS WITH UP-TO-DATE KNOWLEDGE
Courses are taught by full-time lecturers of DHBW, guest lecturers of other universities and colleges, as well as freelance trainers, consultants and executives who contribute cutting-edge knowledge and expertise from their professional fields. Therefore, only applied and up-to-date knowledge is provided.

SMALL CLASSES
Small classes of no more than 30 students ensure close supervision. Being the key feature of efficient learning, it encourages motivation and contributes to successful learning outcomes.
INDUSTRY-RELATED, UP-TO-DATE AND APPLIED
Corporate partners are active members of DHBW. They fulfill administrative duties and contribute to committees and advisory panels. This guarantees that current developments in the field of business, engineering and society are reflected in the university’s curriculum. All study programmes are nationally recognized and count due to the integrated workplace training as intensive degree programmes offering 210 ECTS credit points. Further on, the university actively works together with partner companies and social institutions within the field of cooperative research.

CORPORATE PARTNER LISTS
In order to be enrolled in any study programme offered by DHBW, prospective students first need to apply for a traineeship at any of our partner companies or any approved or otherwise suitable workplace training provider. Lists of partner companies and social institutions are available online, on the websites of each study programme.

RECOGNIZED QUALITY –
THE KEY TO SUCCESS

OUTSTANDING CAREER PROSPECTS
Because of their profound knowledge and cutting-edge expertise acquired during the training phases, DHBW graduates are ready to meet professional challenges. The work-integrated concept ensures that they are highly employable – more than 85% of DHBW graduates have signed a permanent employment contract directly upon graduation.

INTERNATIONAL OUTLOOK
With an increasingly international curriculum, DHBW promotes cooperation with numerous renowned universities and colleges all over the world. This ensures that most degree programmes offer the possibility to include a study abroad experience.

NATIONAL AND INTERNATIONAL RECOGNITION
The internal accreditation of our degree programmes ensures that they are in compliance with the provisions of the current study accreditation regulation (Studienakkreditierungsverordnung) and thereby meet the requirements set out in the Standards and Guidelines for Quality Assurance in the European Higher Education Area (ESG). In the context of the system reaccreditation in 2019, the DHBW’s quality management was once again confirmed to be effective.
